

ICAR Annual Conference & IDF/ISO Analytical Week 2025

Sustainable Livestock Farming through Harmonization, Technology and Innovation

NDDB Anand, Gujarat, India | 29 March - 4 April, 2025

ICAR Annual Conference & IDF/ISO Analytical Week 2025

The International Committee for Animal Recording (ICAR), an International Non-Governmental Organisation (INGO), composed by more than 130 Members from 55 countries, provides an open yet secure network to share with, learn from and interact with fellow members and related stakeholders in global animal production. ICAR annual conference is a global gathering of experts in the field of livestock performance recording, genetic evaluations and livestock improvement programmes.

The International Dairy Federation (IDF) has been uniting the global dairy community since its inception in 1903. Committed to scientific rigor and technical expertise, IDF pioneered the path in promoting sustainable and safe dairy practices, shaping policies, standards and regulations world-wide. International Organization for Standardization (ISO) is an independent, non-governmental organisation that develops international standards. The IDF/ISO Analytical Week is the annual meeting of the dairy experts that develop the joint programme of IDF/ISO for standards for milk and milk products. It is a key meeting to network,

discuss the needs and challenges for the sector, as well as exchange with the testing manufacturers on the latest developments.

The National Dairy Development Board (NDDB) of India is working towards development of dairy farmers. To this end NDDB promotes, finances and supports producer-owned and controlled organisations. The Government of India is actively supporting large-scale performance recording and strengthening milk testing facilities under its schemes like Rashtriya Gokul Mission and National Programme for Dairy Development. The Indian National Committee of the IDF (INC-IDF) is presided by Secretary, Department of Animal Husbandry & Dairying and the Chairman and Managing Director, NDDB is Member Secretary.

Indian dairying is unique in the world. Despite small-scale dairying systems with 2-5 cows per farmer and a production system predominantly based on crop-residue based feeding, India produces an impressive 230.58 million MT of milk annually, making it the top milk producing country in the world.

ICAR along with NDDDB and IDF/INC-IDF along with ISO have come together to jointly organise the ICAR Annual Conference & IDF/ISO Analytical Week 2025 during 29th March to 4th April 2025 to create a unique platform to deliberate upon the latest developments and chart the future course of action in the field of animal recording and testing. On behalf of the Organising Committee, we are delighted to invite you at NDDDB, Anand, Gujarat, India. Anand is the birth place of cooperative movement in India and is popularly known as the “Milk Capital” of India.

The event will offer an unparalleled opportunity to connect with leading organisations in the dairying and animal recording sectors.

India's large-scale recording programmes and research projects generating valuable data on the previously unexplored breeds of cattle & buffaloes and other livestock species is drawing the attention of researchers around the world. Indian educational institutions are actively looking

forward for international collaborations and global partnerships. India's thriving dairy industry and its network of laboratories serving livestock sector present unique business opportunities for dairy processors, equipment manufacturers, instrumentation companies, biotechnology ventures, service laboratories, software providers and others involved in dairy value chain.

The aim is to provide a dynamic platform for sharing experiences, discussing new ideas and addressing emerging issues with global colleagues during the event. Participants will also have the opportunity to explore Indian dairying through technical tours, gaining first-hand insights into the system's innovations.

Sponsorship Opportunities

We invite you to join us as a sponsor for the transformative event, a gathering that brings together industry leaders, professionals and stakeholders in the field of animal recording & milk analyses across the global dairy sector.

This is a unique opportunity to elevate your brand, connect with key decision-makers and showcase your products & services to a targeted audience.

Why Become a Sponsor?

- ✦ **Increase Visibility:** Showcase your brand to the dairy industry's top influencers.
- ✦ **Engage with Industry Leaders:** Connect with key decision-makers, dairy experts and top-tier professionals from the industry.
- ✦ **Highlight Your Innovations:** Showcase your latest products, services, and solutions to a highly engaged audience.
- ✦ **Drive Business Growth:** Reach potential clients, partners, and collaborators, opening doors to new opportunities and collaborations.
